

AbdElmohaimen Mohamed

SRE/DevOps Engineer

London, UK | (+44) 7915452965 | abdelmohaimene@gmail.com | linkedin.com/in/abdelmohaimen

Summary

Experienced DevOps and Cloud engineer with 7 years of experience in Cloud Computing, Infrastructure as Code, monitoring, and CI/CD for big tech companies like AWS (the company), as well as SMEs like British Telecom, ComplyAdvantage, Zad, and Spirula.

Technical Skills

- **Cloud Platforms:** (AWS, GCP).
- **Infrastructure as Code:** (Terraform, CloudFormation, Packer).
- **CI/CD & Automation:** (Jenkins, GitLab CI, ArgoCD, Argo Workflows, Argo Rollouts, Ansible).
- **Containerization:** (Docker, Kubernetes, Helm, ECS, EKS).
- **Service Mesh & Policy:** (Istio, Kyverno).
- **Monitoring & Logging:** (Prometheus, Grafana, ELK, New Relic, CloudWatch, OpsView).
- **Code/Scripting:** (Python, Bash).
- **Security Tools:** (AWS WAF, AWS Shield, IPTables, FirewallD).
- **Serverless:** (Lambda function, Amazon API Gateway, Fargate).
- **Other tools:** (DB, Redis, AWS Load Balancers).

Experience

Cloud DevOps Engineer at BT (British Telecom), UK

[Jan 2025 - Present]

Working as a DevOps engineer for the cloud team.

- **Infrastructure Automation:** Built and maintained Python code to provision AWS resources, automate IAM policies, and streamline account, user, and group creation.
- **Golden AMI:** Led the design and rollout of a Golden AMI strategy, creating hardened, compliant base images. Automated the process using AWS Step Functions and Lambda, ensuring secure and standardized AMIs across the organization.
- **Infrastructure as Code (IaC):** Managed AWS infrastructure using Terraform and developed reusable modules and templates for consistent, scalable deployments.
- **CI/CD Engineering & Migration:** Maintained CI/CD pipelines for applications and infrastructure. Helped the team in migrating from Bamboo to GitLab Runner, deploying the runners as containerized workloads in EKS clusters, and managing the clusters for scalability, reliability, and security.
- **Security & Compliance:** Enforced IAM best practices and least-privilege principles. Implemented monitoring, alerting, and logging using CloudWatch and integrated audit trails with CloudTrail to ensure compliance.

Site Reliability Engineer at ComplyAdvantage (Fincrim), UK

[Jul 2022 - Sep 2024]

Working as an SRE for two squads within the infra tribe.

In the CloudOps squad:

- Maintained infrastructure for stability and security

- Used Terraform Infrastructure as Code (IaC) to manage the ComplyAdvantage cloud estate (Services include EKS, GKE, EC2, S3 buckets, KMS, RDS, ECS, GCS, GKE, GCS in AWS and GCP)
- Managed multiple Kubernetes clusters at a large scale across various regions and providers.
- Used Istio service mesh to secure communication across deployments.
- Managed the deployment of applications using ArgoCD and GitOps.

In the Pipeline Squad:

- Enhanced and implemented advanced CI/CD tools to enhance developer productivity, resulting in a 25% reduction in deployment times.
- Standardized CI/CD pipelines for consistent deployment practices, including multi-architecture builds and security scanning.
- Introduced Harbor container registry for cloud-agnostic image storage, reducing data transfer and storage costs and halving build times.
- Created dashboards for monitoring deployments and identifying issues proactively using Service Level Objectives (SLOs).
- Developed Python scripts to integrate various components of the deployment process and contributed to a Python end-to-end (E2E) testing framework for pipelines.

Amazon Web Services (AWS)

[Oct 2019 – Jun 2022]

Associate DevOps consultant at Amazon “AWS” (Financial Services), UK

- Guided enterprise customers in developing technical expertise, delivering Proof of Concept, workshops, and large-scale implementations for financial customer projects.
- Delivered automation for creating and managing multiple EKS clusters using Terraform for an enterprise UK Fintech client.
- Guided a financial enterprise customer in developing a Python-based serverless solution utilizing AWS-managed machine learning tools for document analysis.
- Focused on solutions involving cloud, web applications, DevOps, big data, and disaster recovery, integrating customer feedback into technology roadmaps.

DevOps/Cloud support engineer at Amazon “AWS”, Ireland

- Supported enterprise and business customers by offering best practices and troubleshooting critical issues in large-scale production environments.
- Specialized in AWS DevOps services, including EKS, ECS, Beanstalk, CodeBuild, CodeDeploy, CodePipeline, CloudFormation, and Fargate.

AWS specialist at Best Response Media (E Commerce), Egypt | contract [Mar 2018 – Aug 2019]

- Prepared and managed infrastructure for developers, supporting multiple AWS accounts across various customer environments.
- Assisted with debugging and implementing AWS services like CloudFormation, CodeDeploy, CodeBuild, S3, and RDS.

DevOps engineer at Zad, Egypt | contract

[Nov 2018 – Jul 2019]

- Led a DevOps team of three engineers in transitioning from manual deployments to fully automated processes using ECS and Kubernetes, resulting in deployment times more than doubling in speed.
- Deployed and managed ELK stack for log monitoring, resulting in a faster way to present application logs and predict any potential incidents
- Implemented standard CI/CD using Jenkins for all environments (dev, staging, production), facilitating secure and rapid code delivery by the development team across multiple company environments.

SysOps engineer at Spirula Systems, Egypt | contract

[Jan 2018 – Nov 2018]

- Administered and optimized live and development environments, implemented security hardening, and automated processes using Jenkins and Ansible.
- Managed web servers (Nginx, Apache) and databases (MySQL, MongoDB)
- Monitored infrastructure and applications using tools like Opsview and New Relic.

Certifications

- AWS Certified Machine Learning – Specialty [\[Aug 2021\]](#)
- AWS Certified Data Analytics – Specialty [\[Jul 2021\]](#)
- AWS Certified DevOps Engineer – Professional [\[Sep 2020\]](#)
- Certified Kubernetes Administrator (CKA) [\[Aug 2020\]](#)
- Certified Kubernetes Application Developer (CKAD) [\[Aug 2020\]](#)
- AWS Certified Solutions Architect – Professional [\[Jun 2020\]](#)
- AWS Certified Solutions Architect – Associate [\[May 2020\]](#)
- CCNA Routing and Switching [\[Mar 2014\]](#)

Education

Bachelor of Engineering, Telecommunication and Electronics, Suhag University, Egypt (2016)

- **Overall Grade:** B-, GPA: 2.95 (Very Good, 79.13%).
- **Graduation Project:** Smart Car with Interactive Tracking System (Linux) - IoT.
- **Graduation Project Grade:** A (Excellent, 100%).
- **Rank:** 10th in Class.
